

Electropure™ EDI History

Electropure™ EDI is a proven electrodeionization technology for building high purity water systems.

History of Electropure EDI

- 1977: Harry O'Hare began tinkering with electronic water purification
- 1979: HOH Water Technology was founded
- 1984: O'Hare EDI patent was issued
- 1996: company was renamed Electropure and sold EDI under the "EPM" tradename
- 1999: Electropure introduced its XL product up to 2.3 m³/h
- 2004: company announced its XL-HTS high temperature stable product
- 2005: SnowPure LLC purchases the Electropure business
- 2007: SnowPure's international sales reach 85% of its total
- 2009: EXL series introduced up to 7 m³/h
- 2010: New Patented UV Technology—Highly Effective

We sell EDI, UV, and GTM worldwide to qualified OEM Pure Water System Integrators.

California

Simple EDI System Design

EDI Applications

- Pharmaceutical: USP Purified Water
- Power Generation
- Industrial Ultrapure Water
- Laboratory Water
- Portable Exchange EDI
- Electronics

XL by Electropure™

Product Summary

Electropure™ EDI

New: EXL™
Industrial XL-R™
Pharma XL-SR™
High Temp XL-HTS™
Laboratory Zapwater™

EDI System Options:

- DC Power
- Metric Conversion Kits
- Stainless Steel Covers
- EDI Cleaning Chemicals
- EDI Sanitization Chemicals

UV Ultraviolet

New: SPUV technology

- Patented Technology
- Energy Efficient (save 90%)

GTM

Liqui-Cel® for CO2 removal

IX Membrane

Excellion™

- Anion Membrane
- Cation Membrane
- Custom Membranes
